ABSTRACT

A method and device for reproducing digital audio data in a mobile station is disclosed. The mobile station can be connected by an adapter with a personal computer in order to download MP3 digital audio data which was previously downloaded from the Internet to a hard disk on the personal computer. The adapter converts parallel data from the computer into serial data for the mobile station, and vice versa. The MP3 digital audio data is downloaded to the mobile station according to a downloading program stored in the personal computer. One method according to the invention comprises the steps of downloading the MP3 audio data stored in the computer to a memory device of the mobile station, and selectively reproducing the MP3 audio data stored in the memory device.
